

After living four years in a thirty-year old house, we decided that we needed new tile and countertops in the kitchen and new carpet throughout the house. At that point we called upon Lakeway Floors. They were extremely helpful in assisting us. They visited our house and helped in selecting the carpet and tile. They also showed us samples of granite for the countertops that would complement the floor and walls of the kitchen, and they directed us to the granite supplier so that we could view larger slabs.. They also recommended a painter who could refinish the kitchen cabinets and attend to some other carpentry problems that we had. Lakeway Floors then coordinated the installation of the tile, carpet, and granite with the painter so that everything flowed quickly, smoothly, and without any significant delay. We can recommend Lakeway Floors to any homeowner who has any or all of the problems that we had.
